REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

The invention as claimed, specifically in combination with a signal generator for generating a reference time pulse in synchronization with the excitation of the sample, a detector generating a position signal according to a detection position and a detection timing pulse synchronized with a detection timing, a time difference measuring device for measuring a time difference between the reference time pulse and the detection time pulse, the detector having a position-sensitive electron multiplier tube with a micro channel plate, the detection timing pulse generated in response to a potential change that occurs when the electrons multiplied by the micro channel are emitted from the micro channel plate and fed from the micro channel plate to the time difference measuring device, with the data processor correcting the time difference according to a distance between a position at which the detection timing pulse is generated on the micro channel plate and the output terminal, and storing the corrected time difference in association with the detection position, is not disclosed or made obvious by the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Konishita US 5,221,836 and Suyama US 5,180,908 teach similar devices but do not disclose or make obvious the synchronization pulses, the time difference measuring device, and the data processor as recited in the claim language.
